As an enthusiastic, self-motivated, reliable and responsible software engineer, I am a mature team player and adaptable to all challenging situations with a track record of success, I possess the necessary skills and experience to contribute effectively to your organization's goals.

Work Experience

Software Engineer | Tanbits — Dec 2023 - Present

- Proficient in React.js with hands-on experience gained through an internship
- Skilled in state management techniques to ensure seamless user experiences
- Experienced in crafting responsive designs for optimal viewing across devices
- Familiar with both static and dynamic routing for efficient navigation within applications
- Proficient in utilizing hooks for state and lifecycle management in React components
- Experienced in Redux.js for managing complex application states
- Adept in utilizing Axios for handling asynchronous HTTP requests
- Capable of creating well-designed and modular components adhering to best practices

MERN Stack Developer | Knowledge Stream Bootcamp — Jun 2023 - Oct 2023

- Completed an intensive MERN Stack Bootcamp, gaining expertise in MongoDB, Express.js, React.js, and Node.js.
- Developed a fully functional e-commerce website with features including product search, sorting, and user authentication.
- Implemented responsive design principles for seamless user experience across various devices.
- Demonstrated proficiency in utilizing third-party libraries and APIs to enhance website functionality.
- Acquired hands-on experience in version control using Git and project management tools.

PROJECTS

React Ecommerce Store

- Fetched API using axios library, async/await, useEffect Hook.
- useState to update state and used as props to show updated state on webpage
- array.map method to display products after fetching from fakestoreapi.com
- Sort with ascending, descending, min and max price functionality
- Product details by id
- Redux Toolkit
- Routing

Business Administration Dashboard

- Developed a highly interactive and responsive user interface using React.js.
- Implemented role-based access controls to manage permissions for different types of users.
- Developed RESTful APIs to handle CRUD operations for business data, ensuring efficient backend communication.
- Used React Router for seamless navigation and dynamic routing within the application.
- Created reusable components and custom hooks to enhance code reusability and maintainability, streamlining the development process.

- Utilized Redux for state management, enabling scalable and maintainable state handling throughout the application.

E-Signature Web Application

- Created responsive screens to ensure the platform is accessible and user-friendly on various devices, including desktops, tablets, and smartphones.
- Utilized Redux for managing the application state.
- Organized the project with a clean and efficient folder structure to enhance maintainability and scalability.
- Added various filters to help users easily search and sort their documents by status, date, signer, and document type.

Portfolio Layout Clone

- Clone a portfolio webpage using HTML and CSS, CSS flex Box, Media queries for mobile responsive

CORE SKILLS

Programming Languages: JavaScript,TypeScript
Developer Tools: Git, Github, VS Code
Frameworks: Bootstrap 5.0, react JS, Express, Next JS, Node JS

SOFT SKILLS

- Team Collaboration
- Continuous Learning
- Problem Solving
- Creative and Innovation

TRAINING & CERTIFICATIONS

- Introduction to react, 10 Pearls university
- HTML, CSS, Javascript, 10 Pearls university
- MERN Stack, Knowledge Stream

EDUCATION

BS, Software Engineering**,** CGPA (3.45) (Feb, 2024)
